DETAILED ACTION

Allowable Subject Matter

Claims 1-11 and 14-24 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding **claims 1-11 and 14-18**, independent claim 1 discloses an imaging device comprising an image memory for storing images, a lenslet array with at least four lenses, at least one image capturing subsystem of a first type, comprising a lens arrangement including three lenses from the lenslet array and a portion of a sensor array, configured to produce images, at least one image capturing subsystem of a second type comprising a lens arrangement including the fourth lens from the lenslet array and a portion of the sensor array, having optical or light gathering properties different from the subsystem of first type, configured to produce an image, and a controller configured to select the subsystem with which an image is to be taken wherein an image is captured and stored only with the selected subsystem, which is neither taught or an obvious variation of the relevant prior art.

Regarding **claims 19-21**, independent claim 19 discloses an imaging device comprising an image memory for storing images, a lenslet array with four lenses, at least one sensor array, an image capturing subsystem of a first type comprising a lens arrangement, configured to produce images, the lens arrangement of the image capturing subsystem of a first type device comprising three lenses from the lenslet array, and a sensor array, an image capturing subsystem of a second type comprising a

lens arrangement, having optical or light gathering properties different from the subsystem of first type, configured to produce an image, the lens arrangement of the image capturing subsystem of a second type device comprising at least one lens from the lenslet array, and a sensor array, and a controller configured to select the subsystem with which an image is to be taken and to capture and store an image only with the selected subsystem, which is neither taught or an obvious variation of the relevant prior art.

Regarding **claims 22-24**, independent claim 22 discloses a method comprising collecting first image data via an image capturing subsystem of a first type comprised of three lenses from a lenslet array and a portion of a sensor array; collecting second image data via an image capturing subsystem of a second type comprised of a fourth lens from the lenslet array and a portion of the sensor array having optical or light gathering properties different from the subsystem of the first type, wherein the first and second image data correspond to the same image; selecting the subsystem with which to capture the image; capturing the image with only one subsystem; and storing the captured image in an image memory, which is neither taught or an obvious variation of the relevant prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
